Subject index

Acetonitrile
Mechanisms of reductive addition of CO_2 to quinones in acetonitrile (Nagaoka et al.) 383
Acid media
The electrochemical behaviour of hydrous palladium oxide layers formed at high positive potentials in different electrolyte solutions (Bolzán, Arvia) 247
Adsorption
An FTIR study of adsorbed sulfate species on polycrystalline platinum with application of group theory to the problem of band assignment for adsorbed species (Nart, Iwasita) 289
Adsorption and oligomerization of indole molecules at Ag electrode as studied by SERS spectroscopy (Bukowska, Jackowska) 347
Adsorption of pyridine at the Au(311)–solution interface (Stolberg et al.) 357
Alakaline media
The electrochemical behaviour of hydrous palladium oxide layers formed at high positive potentials in different electrolyte solutions (Bolzán, Arvia) 247
Alkaline media
Electro-oxidation of methanol on graphite-supported perovskite-modified Pt electrodes in alkaline solution (Biswas, Enyo) 203
Alkylphosphates
Electrochemistry of hydrophobic Nafion gels Part 3. Preconcentration and electrochemical detection of cationic and neutral organic compounds in hydrophobic Nafion gels made from various *n*-alkylphosphates (Audebert et al.) 301
Aluminium
A comparative study of the interphase between mercury and aqueous solutions of mono-, di- and trivalent chlorides (Andreu, Molero) 133
Aqueous media
A comparative study of the interphase between mercury and aqueous solutions of mono-, di- and trivalent chlorides (Andreu, Molero) 133
Azobenzene
The photo-isomerisation of *cis*-azobenzene. A channel electrode study (Compton et al.) 183

Band assignment
An FTIR study of adsorbed sulfate species on polycrystalline platinum with application of group theory to the problem of band assignment for adsorbed species (Nart, Iwasita) 289

Calcium
A comparative study of the interphase between mercury and aqueous solutions of mono-, di- and trivalent chlorides (Andreu, Molero) 133
Capacitance
Frequency dispersion associated with a non-homogeneous interfacial capacitance (Kurtyka, De Levie) 63
Carbon dioxide
Electroreduction of CO_2 on differently prepared copper electrodes. The influence of electrode treatment on the current efficiences (Kyriacou, Anagnostopoulos) 233
Mechanisms of reductive addition of CO_2 to quinones in acetonitrile (Nagaoka et al.) 383
Carbon dioxide reduction
The adsorption of Ni(cyclam)$^+$ at mercury electrodes and its relation to the electrocatalytic reduction of CO_2 (Balazs, Anson) 325
Channel electrode voltammetry
The photo-isomerisation of *cis*-azobenzene. A channel electrode study (Compton et al.) 183

Chloride ions
A comparative study of the interphase between mercury and aqueous solutions of mono-, di- and trivalent chlorides (Andreu, Molero) 133
Chromium ions
Electrochemical behavior of Cr(II) and Cr(III) ions in weakly acidic solutions (Wrona) 119
Chronocoulometry
Electrochemical behavior of Cr(II) and Cr(III) ions in weakly acidic solutions (Wrona) 119
Copper
Electroreduction of CO_2 on differently prepared copper electrodes. The influence of electrode treatment on the current efficiences (Kyriacou, Anagnostopoulos) 233
Inhibition of the underpotential deposition of copper on single crystalline platinum surfaces (Bhatt et al.) 279
Current efficiences
Electroreduction of CO_2 on differently prepared copper electrodes. The influence of electrode treatment on the current efficiences (Kyriacou, Anagnostopoulos) 233
Cyclic voltammetry
Reversible cyclic voltammetry in the presence of product (Keightley et al.) 25
Cyclic voltammetry, ESR and optical study of the electrochemical reduction of dibenz[b,e]-thiepinon-5,5-dioxides (Ciureanu et al.) 221
In-situ monitoring of microrheology on electrochemical deposition using an advanced quartz crystal analyzer and its application to polypyrrole deposition (Muramatsu et al.) 311

Deposition
Inhibition of the underpotential deposition of copper on single crystalline platinum surfaces (Bhatt et al.) 279
Deuterium
Tritium and neutron emission in D_2O electrolysis at Pd and Ti cathodes (Mengoli et al.) 107
The absorption of hydrogen and deuterium in thin palladium electrodes. Part II: Basic solutions (Czerwinski, Marassi) 373
Dibenz[b,e]-thiepinon-5, 5-dioxides
Cyclic voltammetry, ESR and optical study of the electrochemical reduction of dibenz[b,e]-thiepinon-5,5-dioxides (Ciureanu et al.) 221
Differential pulse voltammetry
Differential pulse voltammetry of reversible redox species at interdigitated array electrodes (Morita et al.) 191
Display devices
Electrical control of reversible microgel flocculation and its estimated performance as a display device (Sawai et al.) 1
Dropping mercury electrode
A method to determine the size of surface active particles from heterocoalescence signals at the dropping mercury electrode (Tomaić et al.) 79

Electrointercalation
The mechanism of electrointercalation (Bruce, Saidi) 93
Electro-oxidation
Electro-oxidation of methanol on graphite-supported perovskite-modified Pt electrodes in alkaline solution (Biswas, Enyo) 203
Electroreduction
Electroreduction of CO_2 on differently prepared copper electrodes. The influence of electrode treatment on the current efficiences (Kyriacou, Anagnostopoulos) 233
ESR spectroscopy
Cyclic voltammetry, ESR and optical study of the electrochemical reduction of dibenz[b,e]-thiepinon-5,5-dioxides (Ciureanu et al.) 221

Fourier Transform
Hilbert transformation of immittance data using the Fast Fourier Transform (VanderNoot) 9
Frequency dispersion
Frequency dispersion associated with a non-homogeneous interfacial capacitance (Kurtyka, De Levie) 63
FTIR
An FTIR study of adsorbed sulfate species on polycrystalline platinum with application of group theory to the problem of band assignment for adsorbed species (Nart, Iwasita) 289

Gold
Adsorption of pyridine at the Au(311)–solution interface (Stolberg et al.) 357

Graphite
Electro-oxidation of methanol on graphite-supported perovskite-modified Pt electrodes in alkaline solution (Biswas, Enyo) 203
Group theory
An FTIR study of adsorbed sulfate species on polycrystalline platinum with application of group theory to the problem of band assignment for adsorbed species (Nart, Iwasita) 289

Heterocoalescence
A method to determine the size of surface active particles from heterocoalescence signals at the dropping mercury electrode (Tomaić et al.) 79
Hexa-alkoxytriphenylenes
On the redox response of insoluble deposits of hexa-alkoxytriphenylenes at solid anodes (Simonet, Chapuzet) 399
High positive potentials
The electrochemical behaviour of hydrous palladium oxide layers formed at high positive potentials in different electrolyte solutions (Bolzán, Arvia) 247
Hilbert Transform
Hilbert transformation of immittance data using the Fast Fourier Transform (Vander-Noot) 9
Hydrogen
The absorption of hydrogen and deuterium in thin palladium electrodes. Part II: Basic solutions (Czerwinski, Marassi) 373
Hydrous palladium oxide layers
The electrochemical behaviour of hydrous palladium oxide layers formed at high positive potentials in different electrolyte solutions (Bolzán, Arvia) 247

Immiscible electrolytes
Current–potential characteristic of ion transfer across the interface between two immiscible electrolyte solutions based on the Nernst–Planck equation (Kakiuchi) 55
Immittance Data
Hilbert transformation of immittance data using the Fast Fourier Transform (Vander-Noot) 9
Indium tin oxide coated glass electrode
Electrochemical polymerization of pyrrole in aqueous buffer solutions (Pei, Qian) 153
Indole
Adsorption and oligomerization of indole molecules at Ag electrode as studied by SERS spectroscopy (Bukowska, Jackowska) 347
Insoluble deposits
On the redox response of insoluble deposits of hexa-alkoxytriphenylenes at solid anodes (Simonet, Chapuzet) 399
Interdigitated array electrodes
Differential pulse voltammetry of reversible redox species at interdigitated array electrodes (Morita et al.) 191
Interface
Adsorption of pyridine at the Au(311)–solution interface (Stolberg et al.) 357
Interfaces
Frequency dispersion associated with a non-homogeneous interfacial capacitance (Kurtyka, De Levie) 63
Ion transfer
Current–potential characteristic of ion transfer across the interface between two immiscible electrolyte solutions based on the Nernst–Planck equation (Kakiuchi) 55
ITIES
Current–potential characteristic of ion transfer across the interface between two immiscible electrolyte solutions based on the Nernst–Planck equation (Kakiuchi) 55

Juglone
Electrochemistry of hydrophobic Nafion gels Part 3. Preconcentration and electrochemical detection of cationic and neutral organic compounds in hydrophobic Nafion gels made from various *n*-alkylphosphates (Audebert et al.) 301

Lanthanum
A comparative study of the interphase between mercury and aqueous solutions of mono-, di- and trivalent chlorides (Andreu, Molero) 133
Lawsone
Electrochemistry of hydrophobic Nafion gels Part 3. Preconcentration and electrochemical detection of cationic and neutral organic compounds in hydrophobic Nafion gels made from various *n*-alkylphosphates (Audebert et al.) 301

Lithium
The mechanism of electrointercalation (Bruce, Saidi) 93
A comparative study of the interphase between mercury and aqueous solutions of mono-, di- and trivalent chlorides (Andreu, Molero) 133

Magnesium
A comparative study of the interphase between mercury and aqueous solutions of mono-, di- and trivalent chlorides (Andreu, Molero) 133
Mercury
A comparative study of the interphase between mercury and aqueous solutions of mono-, di- and trivalent chlorides (Andreu, Molero) 133
Mercury electrodes
The adsorption of Ni(cyclam)$^+$ at mercury electrodes and its relation to the electrocatalytic reduction of CO_2 (Balazs, Anson) 325
Methanol
Electro-oxidation of methanol on graphite-supported perovskite-modified Pt electrodes in alkaline solution (Biswas, Enyo) 203
Microgels
Electrical control of reversible microgel flocculation and its estimated performance as a display device (Sawai et al.) 1
Microrheology
In-situ monitoring of microrheology on electrochemical deposition using an advanced quartz crystal analyzer and its application to polypyrrole deposition (Muramatsu et al.) 311
Modified electrodes
Electro-oxidation of methanol on graphite-supported perovskite-modified Pt electrodes in alkaline solution (Biswas, Enyo) 203
On thionine adsorption at platinum and sulphur-modified platinum electrodes (Clavilier, Svetličić) 405

Nafion gels
Electrochemistry of hydrophobic Nafion gels Part 3. Preconcentration and electrochemical detection of cationic and neutral organic compounds in hydrophobic Nafion gels made from various *n*-alkylphosphates (Audebert et al.) 301

Nernst–Planck equation
Current–potential characteristic of ion transfer across the interface between two immiscible electrolyte solutions based on the Nernst–Planck equation (Kakiuchi) 55
Neutron emission
Tritium and neutron emission in D_2O electrolysis at Pd and Ti cathodes (Mengoli et al.) 107
Ni(Cyclam)$^+$
The adsorption of Ni(cyclam)$^+$ at mercury electrodes and its relation to the electrocatalytic reduction of CO_2 (Balazs, Anson) 325

Oligomerization
Adsorption and oligomerization of indole molecules at Ag electrode as studied by SERS spectroscopy (Bukowska, Jackowska) 347
Optical spectroscopy
Cyclic voltammetry, ESR and optical study of the electrochemical reduction of dibenz [b,e]-thiepinon-5,5-dioxides (Ciureanu et al.) 221

Palladium Electrodeposition
Palladium electrodeposition from Ammonia-free electrolyte (Lai et al.) 267
Palladium electrodes
Tritium and neutron emission in D_2O electrolysis at Pd and Ti cathodes (Mengoli et al.) 107
Perovskite
Electro-oxidation of methanol on graphite-supported perovskite-modified Pt electrodes in alkaline solution (Biswas, Enyo) 203
Photo-isomerisation
The photo-isomerisation of *cis*-azobenzene. A channel electrode study (Compton et al.) 183
Platinum
Electro-oxidation of methanol on graphite-supported perovskite-modified Pt electrodes in alkaline solution (Biswas, Enyo) 203
Inhibition of the underpotential deposition of copper on single crystalline platinum surfaces (Bhatt et al.) 279
An FTIR study of adsorbed sulfate species on polycrystalline platinum with application of group theory to the problem of band assignment for adsorbed species (Nart, Iwasita) 289

Preparation for platinum electrode with single crystal (100) film (Sumino, Shibata) 391
On thionine adsorption at platinum and sulphur-modified platinum electrodes (Clavilier, Svetličić) 405
Platinum electrodes
Electrochemical polymerization of pyrrole in aqueous buffer solutions (Pei, Qian) 153
Polymerization
Electrochemical polymerization of pyrrole in aqueous buffer solutions (Pei, Qian) 153
In-situ conductance measurement during electropolymerization (Kankare, Kupila) 167
Polypyrrole
In-situ monitoring of microrheology on electrochemical deposition using an advanced quartz crystal analyzer and its application to polypyrrole deposition (Muramatsu et al.) 311
Polypyrrole films
Electrochemical polymerization of pyrrole in aqueous buffer solutions (Pei, Qian) 153
Potassium
A comparative study of the interphase between mercury and aqueous solutions of mono-, di- and trivalent chlorides (Andreu, Molero) 133
Product effects
Reversible cyclic voltammetry in the presence of product (Keightley et al.) 25
Pyridine
Adsorption of pyridine at the Au(311)–solution interface (Stolberg et al.) 357
Pyrrole
Electrochemical polymerization of pyrrole in aqueous buffer solutions (Pei, Qian) 153
In-situ conductance measurement during electropolymerization (Kankare, Kupila) 167

Quartz crystals
In-situ monitoring of microrheology on electrochemical deposition using an advanced quartz crystal analyzer and its application to polypyrrole deposition (Muramatsu et al.) 311
Quinones
Mechanisms of reductive addition of CO_2 to quinones in acetonitrile (Nagaoka et al.) 383

Reductive additions
Mechanisms of reductive addition of CO_2 to quinones in acetonitrile (Nagaoka et al.) 383
Reversible cyclic voltammetry
Reversible cyclic voltammetry in the presence of product (Keightley et al.) 25
Reversible flocculation
Electrical control of reversible microgel flocculation and its estimated performance as a display device (Sawai et al.) 1
Reversible redox species
Differential pulse voltammetry of reversible redox species at interdigitated array electrodes (Morita et al.) 191
SERS spectroscopy
Adsorption and oligomerization of indole molecules at Ag electrode as studied by SERS spectroscopy (Bukowska, Jackowska) 347
Silver electrodes
Adsorption and oligomerization of indole molecules at Ag electrode as studied by SERS spectroscopy (Bukowska, Jackowska) 347
Single crystal film
Preparation for platinum electrode with single crystal (100) film (Sumino, Shibata) 391
Single crystals
Inhibition of the underpotential deposition of copper on single crystalline platinum surfaces (Bhatt et al.) 279
Sodium
A comparative study of the interphase between mercury and aqueous solutions of mono-, di- and trivalent chlorides (Andreu, Molero) 133
Solid anodes
On the redox response of insoluble deposits of hexa-alkoxytriphenylenes at solid anodes (Simonet, Chapuzet) 399
Sulphate
An FTIR study of adsorbed sulfate species on polycrystalline platinum with application of group theory to the problem of band assignment for adsorbed species (Nart, Iwasita) 289
Sulphur-modified platinum
On thionine adsorption at platinum and sulphur-modified platinum electrodes (Clavilier, Svetličić) 405
Surface active particles
A method to determine the size of surface active particles from heterocoalescence signals at the dropping mercury electrode (Tomaić et al.) 79

Thin films
In-situ monitoring of microrheology on electrochemical deposition using an advanced quartz crystal analyzer and its application to polypyrrole deposition (Muramatsu et al.) 311
Thin palladium electrodes
The absorption of hydrogen and deuterium in thin palladium electrodes. Part II: Basic solutions (Czerwinski, Marassi) 373
Thionine adsorption
On thionine adsorption at platinum and sulphur-modified platinum electrodes (Clavilier, Svetličić) 405
TiS_2 electrodes
The mechanism of electrointercalation (Bruce, Saidi) 93
Titanium electrodes
Tritium and neutron emission in D_2O electrolysis at Pd and Ti cathodes (Mengoli et al.) 107
Tritium emission
Tritium and neutron emission in D_2O electrolysis at Pd and Ti cathodes (Mengoli et al.) 107

Underpotential deposition
Inhibition of the underpotential deposition of copper on single crystalline platinum surfaces (Bhatt et al.) 279
